SAUTER  
—Pianofortemanufaktur—

# The fine art of beautiful sound

---

*Over 190 years for perfection and the future of piano making.*

---

*SAUTER has been the home of the fine art of beautiful sounds since 1819. Johann Grimm returned from Vienna after completing an apprenticeship under the most reputed piano makers of the time, Nannette Stein and Johann Andreas Streicher, to his home in Spaichingen and founded his own piano workshop. We are still committed to the high demands of quality embodied by these names, who made instruments for Beethoven and other famous musicians.*

*It therefore comes as no surprise that the SAUTER pianoforte manufactory in Spaichingen, as the oldest piano manufactory, ranks among the best piano makers still in business in the world.*

*SAUTER combines crafted perfection with unparalleled technology. A number of intricacies in the piano making trade, which were developed at SAUTER that contribute to delivering extraordinary sound, are patented and vouch for our spirit of innovation when it comes to music. With the outstanding design of our instruments, we also create a harmonious blend of the piano making tradition, its century-old history and the unique demands of modern living spaces.*

*With its commitment to the “Made in Germany” seal of quality, SAUTER piano manufactory has attracted the attention of concert halls, operas, conservatories and universities.*
